SUMMARY

Results-driven Public Health Professional with a background in Health Education and years of progressive experience spanning program management, monitoring & evaluation (M&E), health data analysis, research, and community advocacy. Demonstrated ability to design and implement evidence-based health programs, develop M&E logframes, and generate actionable data insights using advanced Excel, Power BI, SQL, SPSS, and Tableau. Proven track record of leading digital health initiatives across Africa, engaging 1,000+ beneficiaries, and contributing to measurable public health outcomes. Passionate about leveraging data, advocacy, and technology to strengthen health systems and contribute to organization success.

CORE COMPETENCIES & TECHNICAL SKILLS

- Monitoring & Evaluation (M&E) Design
- Health Data Analysis & Visualization
- Epidemiological Analysis & Surveillance
- Gender-Responsive Health Programming
- Public Health Education & Behavior Change
- Data Management, Cleaning & QA
- Program Planning & Management
- Research Design & Report Writing
- Stakeholder Engagement & Advocacy
- Digital Health & eHealth Systems
- Community Mobilization & Outreach
- Technical & Grant Writing

Technical Tools: Advanced Microsoft Excel (Pivot Tables, Power Query) | Power BI | Tableau | SQL | SPSS | R | Microsoft Office Suite

WORK EXPERIENCE

Program & M&E Officer ***April 2025 – Present***
Digital Health Africa (DHA), Kigali, Rwanda. (Remote)

- Lead the planning and execution of digital health training programs and advocacy campaigns aimed at improving healthcare access, delivery, and digital literacy across Africa.
- Designed and implemented a comprehensive M&E logframe for the 'Advancing Gender-Responsive Health Systems in Africa' project; defining indicators, data collection methodologies, and reporting frameworks to track program performance and outcomes.
- Led the 'Advancing Gender-Responsive Health Systems in Africa' initiative in commemoration of International Women's Day, coordinating 100+ participants across multiple African countries and delivering measurable outcomes in gender-responsive health systems.
- Facilitated and supported AI in Healthcare training cohorts (1, 2 & 3) for health professionals across Africa, emphasizing the transformative role of artificial intelligence in improving healthcare delivery, diagnostics, and health information systems.
- Supported digital health tool adoption programs, training participants in the practical use of digital platforms to enhance health education, telemedicine, and community health delivery.
- Monitored and assessed program indicators and KPIs; compiled data-driven progress reports, donor updates, and proposals to inform strategic decision-making.
- Participated in M&E training cohorts 1, 2 & 3 for public health professionals across Africa, strengthening organizational M&E capacity

Impact: *Led initiatives impacting **200+** program beneficiaries across multiple African regions; developed M&E tools that improved program accountability and measurable health outcomes.*

Research Officer & Copywriter ***November 2024 – March 2026***

Roods (Contract), Netherland. (Remote).

- Conducted comprehensive research, translating complex findings into clear, accurate, and engaging written content for digital platforms.
- Developed, wrote, and edited high-quality copy, ensuring factual accuracy, strong evidence-based storytelling, and audience alignment.
- Organized and managed research databases; applied rigorous fact-checking protocols and collaborated with multidisciplinary contributors to ensure content quality.

Impact: *Synthesized **1,000+** research records into reliable, story-ready insights, improving content accuracy and production speed significantly.*

Public Health Educator (NYSC) ***August 2024 – June 2025***

University of Abuja Teaching Hospital, FCT – Abuja.

- Designed and delivered health education programs promoting healthy lifestyles, disease prevention, and behavior change among hospital patients and community members.
- Conducted nutritional screenings, food security assessments, and community health surveys to monitor health conditions and inform targeted interventions.
- Collaborated with a multidisciplinary team of physicians, nurses, and public health specialists to deliver accurate, evidence-based health information and services.
- Developed and distributed health communication materials, reinforcing public health messaging on key conditions including malaria, tuberculosis, and HIV/AIDS.

Impact: *Supported health education and screening activities reaching **1,000+** patients and community members throughout the NYSC service period.*

Data Collector & Analysis ***September, 2024 – March, 2025***

Virtual Executive Company, Abuja, Nigeria.

- Collected, cleaned, and analyzed survey data using Excel, R, and SQL; ensured data integrity, accuracy, and readiness for strategic business analysis.
- Provided administrative support including calendar management, correspondence handling, and stakeholder coordination.

Impact: *Managed and processed survey responses from **500+** participants to support evidence-based business decision-making.*

Health Education Officer (Intern) ***May, 2021 – October, 2021***

Federal Ministry of Health, Ilorin, Kwara State, Nigeria.

- Participated in a high-impact multi-agency advocacy program organized by the Federal Ministry of Health in collaboration with Leap Health and multiple NGOs in Kwara State, mobilizing communities on tuberculosis, hepatitis B, HIV/AIDS, malaria, and other communicable diseases.
- Organized community outreach activities, workshops, and awareness campaigns; distributed preventive health resources including mosquito nets, condoms, and vaccines to reduce disease transmission.
- Delivered individual and group health talks designed to drive behavior change and promote healthier community practices.

Impact: *Contributed to a cross-sector advocacy campaign that reached 1,000+ community members, strengthening disease prevention knowledge and resource access in Kwara State.*

PROJECT

Advancing Gender-Responsive Health Systems in Africa **2025**

- Designed and led this flagship initiative at Digital Health Africa, engaging 100+ health professionals across Africa.
- Developed a full M&E logframe with defined indicators, data collection tools, and reporting mechanisms.
- Outcomes presented to stakeholders as part of International Women's Day health systems strengthening agenda.

Impact of Climate Variability on Malaria Incidence in Southwest & Niger Delta, Nigeria **2024**

- Conducted an in-depth epidemiological analysis of malaria trends using a multi-year dataset (2000–2024).
- Built a structured Power BI dataset incorporating epidemiological, climatic, and intervention metrics for interactive analytics.
- Portfolio: notion.so/Impact-of-Climate-Variability-on-Malaria-Incidence

Diabetes Risk Factor Analysis Report **2025**

- Used Excel pivot tables, filtering, and data summaries to analyze risk factors; generated actionable health insights and visualizations.
- Portfolio: notion.so/Diabetes-Risk-Factor-Analysis
